

Vladislav Laikov

Senior Backend Engineer · PHP / Symfony · 7+ years · high-load, architecture & any complex domain

{ Profile }

Senior backend engineer: I build, scale, and **own** the systems businesses depend on — **7+ years** in **PHP** across SaaS, FinTech, healthcare and web platforms. **Adaptable by default** (PHP 5.6 → 8.5, 4 companies, any domain); strongest in **scalable architecture**, **high-load** and database performance. Currently leading backend on **systeme.io** — microservices, payment integrations, **~50 TB** of data. **Domain-agnostic by choice**, open to remote.

Adaptable senior

4 companies · SaaS · FinTech · healthcare

MIGRATIONS

Migration expert

PHP 5.6 → 8.5 · PG 14 → 18

SCALE

High-load engineer

~50 TB SaaS · 2 TB+ fintech

{ Experience }

Senior Backend Engineer (PHP/Symfony) @ systeme.io

APR 2024 — PRESENT · REMOTE

SaaS for online business · ~50 TB · 12+ payment providers · Microservices

- Own **all 12+ payment integrations** on a SaaS processing **~50 TB**; built **ApplePay via Stripe** end-to-end — mobile checkout for US/EU markets.
- Decomposed **Flutterwave** from the monolith into a **microservice**; designed a **partial-refund engine** orchestrating multi-provider webhooks via **Chain of Responsibility**.
- Led a **PostgreSQL 14 → 18** zero-downtime upgrade (logical replication); drove **PHP 8.3 → 8.5** and **Symfony 6.4 → 7.4 LTS**; cut hot-path latency **3×** with the payments team.

PHP 8.5 · Symfony 7 · PostgreSQL 18 · MongoDB · Redis · AWS · RabbitMQ · Kafka

Grafana / Loki

Backend Engineer (PHP) @ Octopays (Mservis)

MAR 2023 — MAR 2024 · REMOTE

Fintech CORE team · 2 TB+ production DB · real-time transactions

- Core engineer on a high-load fintech platform: **2 TB+** production DB, real-time transaction processing, event-driven on **Kafka**.
- Ran **PHP 7.4 → 8.2** and **Laravel 9 → 10** migrations, a **MySQL → PostgreSQL** switch on a critical contour; **PHPUnit**, **PHPStan**, observability on **ELK**.

PHP 8.2 · Laravel 10 · MySQL → PostgreSQL · Redis · Kafka · Docker · ELK

Backend Engineer (PHP) @ Basis33

APR 2020 — MAR 2023 · REMOTE

Team of 25 engineers · DeinArzt (medical) · Fsexpert (Zoom API)

- Shipped **DeinArzt** (German medical platform, 2 years, strict compliance) and **Fsexpert** (Zoom API) in a **25-engineer team**; SQL optimization, **replication & partitioning** of the production cluster.

PHP 7.4 · Symfony 5.3 · API Platform · MySQL · RabbitMQ · GitLab CI/CD

Backend Engineer (PHP) @ Sollento Group

FEB 2019 — MAR 2020 · REMOTE

SPA classifieds + scraper · SOA architecture

- Built a **REST API from scratch** on **PostgreSQL**, set up **CI/CD** on GitLab, created a web scraper; structured the codebase as **SOA** following SOLID and GRASP.

PHP · Symfony · Doctrine · PostgreSQL · Docker · Swagger
